

Certified Information Systems Security Officer

If you are looking for the “gotta have it” cybersecurity course, then the Certified Information Systems Security Officer is for you. The C)ISSO will prepare you with a broad range of knowledge and skills required of a security officer. However, these skills can be applied across a broad range of role-based careers. You will learn theories in security concepts, practices, monitoring and compliance in IS management.

A C)ISSO is able to implement and maintain cost-effective security controls that are closely aligned with business and industry standards. The C)ISSO certification course is an ideal way to increase knowledge, expertise, and skill for managers, auditors, and INFOSEC professionals.

At Mile2 we consider the C)ISSO to be one of our flagship courses. The things you learn in this course can be applied to management, prevention teams, and recovery professionals.

Annual Salary Potential

\$92,662 AVG/year

Accreditations

Upon Completion

Upon completion, **Certified Information Systems Security Officer** students will not only be able to establish industry acceptable Cyber Security & IS management standards with current best practices but also be prepared to competently take the CISSO exam.

Re-Certification Requirements

All Mile2 certifications will be awarded a 3-year expiration date.

There are two requirements to maintain Mile2 certification:

- 1) Pass the most current version of the exam for your respective existing certification
- 2) Earn 20 CEUs (*Continuing Education Units*) per year. You may submit your CEUs in your Mile2 inbox. These CEUs must fall under "Qualify Continuing Educational Activities).

Visit our [certification renewal page](#) for more information.

Exam Information

The **Certified Information Systems Security Officer** exam is taken online through Mile2's Assessment and Certification System ("MACS"), which is accessible on your mile2.com account. The exam will take 2 hours and consist of 100 multiple choice questions.
