## Upon Completion

Upon completion, the Certified Security Awareness 1 candidate will be able to competently take the C)SA1 exams well as be able to understand basic cybersecurity principles to keep companies' IP and IT infrastructure safe.

## Exam Information

The Certified Network Principles exam is taken online through Mile2's Learning Management System and is accessible on your Mile2.com account.

A minimum grade of 80% is required for certification.

## Re-Certification Requirements

All Mile2 certifications will be awarded a 3-year expiration date.

There are two requirements to maintain Mile2 certification:

- 1) Pass the most current version of the exam for your respective existing certification
- 2) Earn and submit 20 CEUs per year in your Mile2 account.

## Course FAQ's

**Question:** Do I have to purchase a course to buy a certification exam?

Answer: No

**Question:** Do all Mile2 courses map to a role-based career path?

Answer: Yes. You can find the career path and other courses associated with it at [www.mile2.com](http://www.mile2.com).

**Question:** Are all courses available as self-study courses?

Answer: Yes. There is however 1 exception. The Red Team vs Blue Team course is only available as a live class.

**Question:** Are Mile2 courses transferable/shareable?

Answer: No. The course materials, videos, and exams are not meant to be shared or transferred.

## Course and Certification Learning Options

## Detailed Outline:

### Course Introduction

### Module 1 - Basic Security Awareness

What is it and why it's needed?

End User Risk Trends

- Who, What and How are people the target
- What are the losses associated to end user hacks?
  - The policies are as good as the employee who embraces them

### Module 2 - Social Engineering

Phishing

- mail, via phone, social websites are common

Spear Phishing

- Example: Fake email sample

Social media

Personification

### Module 3 - Data Classification and corporate use (Safe Guarding)

Corporate

- Sensitive, internal or public classification
- Objectives of securing data (IP, Compliance/legislature)

Personal vs. Business Use

- Segregating personal use with business use

Data management

- Business standard for deleting data
- Personal standard of data dumping (old phones/hard drives and usb)
- Did you know that I can unearth deleted docs from a USB drive from a standard Forensics app off of the internet?

How to delete and get rid of your old data

### Module 4 - End User Best Practices

Internet utilization

- Hot spots, public places & roaming risks

## Safe Web Site surfing

- Discerning safe secure sites (never go to a site link indirectly)
- Locks and HTTPS

## Computer Usage

- Using computer in non-admin mode
- Ransomware

## Password management

## Removable Devices

## Mobile, Smart Phones and Tablets (risks associated with mobile devices)

- Device always locked
- Device should always be trackable
